Richland, WA 9935

Statement of Qualifications

The ADVETAGE Advantage!

Established 8a AND Service-Disabled Veteran Owned Small Business.

Mission Statement: To provide 360-degree solutions to the scientific and safety industry, offering innovative technology and technical services at the best possible value, with world class customer service.

What We do: We are combining custom engineering solutions with the most advanced technology to provide our customers with complete solutions. In addition to being an instrument supplier, we offer radiation protection and safety services (CHP, EH&S, Rad Engineering), project management and execution, custom instrument integration, technical staffing solutions, training, D&D, and waste brokerage to meet our customer's needs. We understand the variety of problems our customers encounter. Our team has diverse experience helping our customers source and implement the right solutions.

Our Differentiator: With our technical knowledge, industry experience and vast supply channels, we will provide the highest quality laboratory products, safety equipment, consulting, custom training and solution services at the most competitive pricing, adding value to both end users and suppliers.

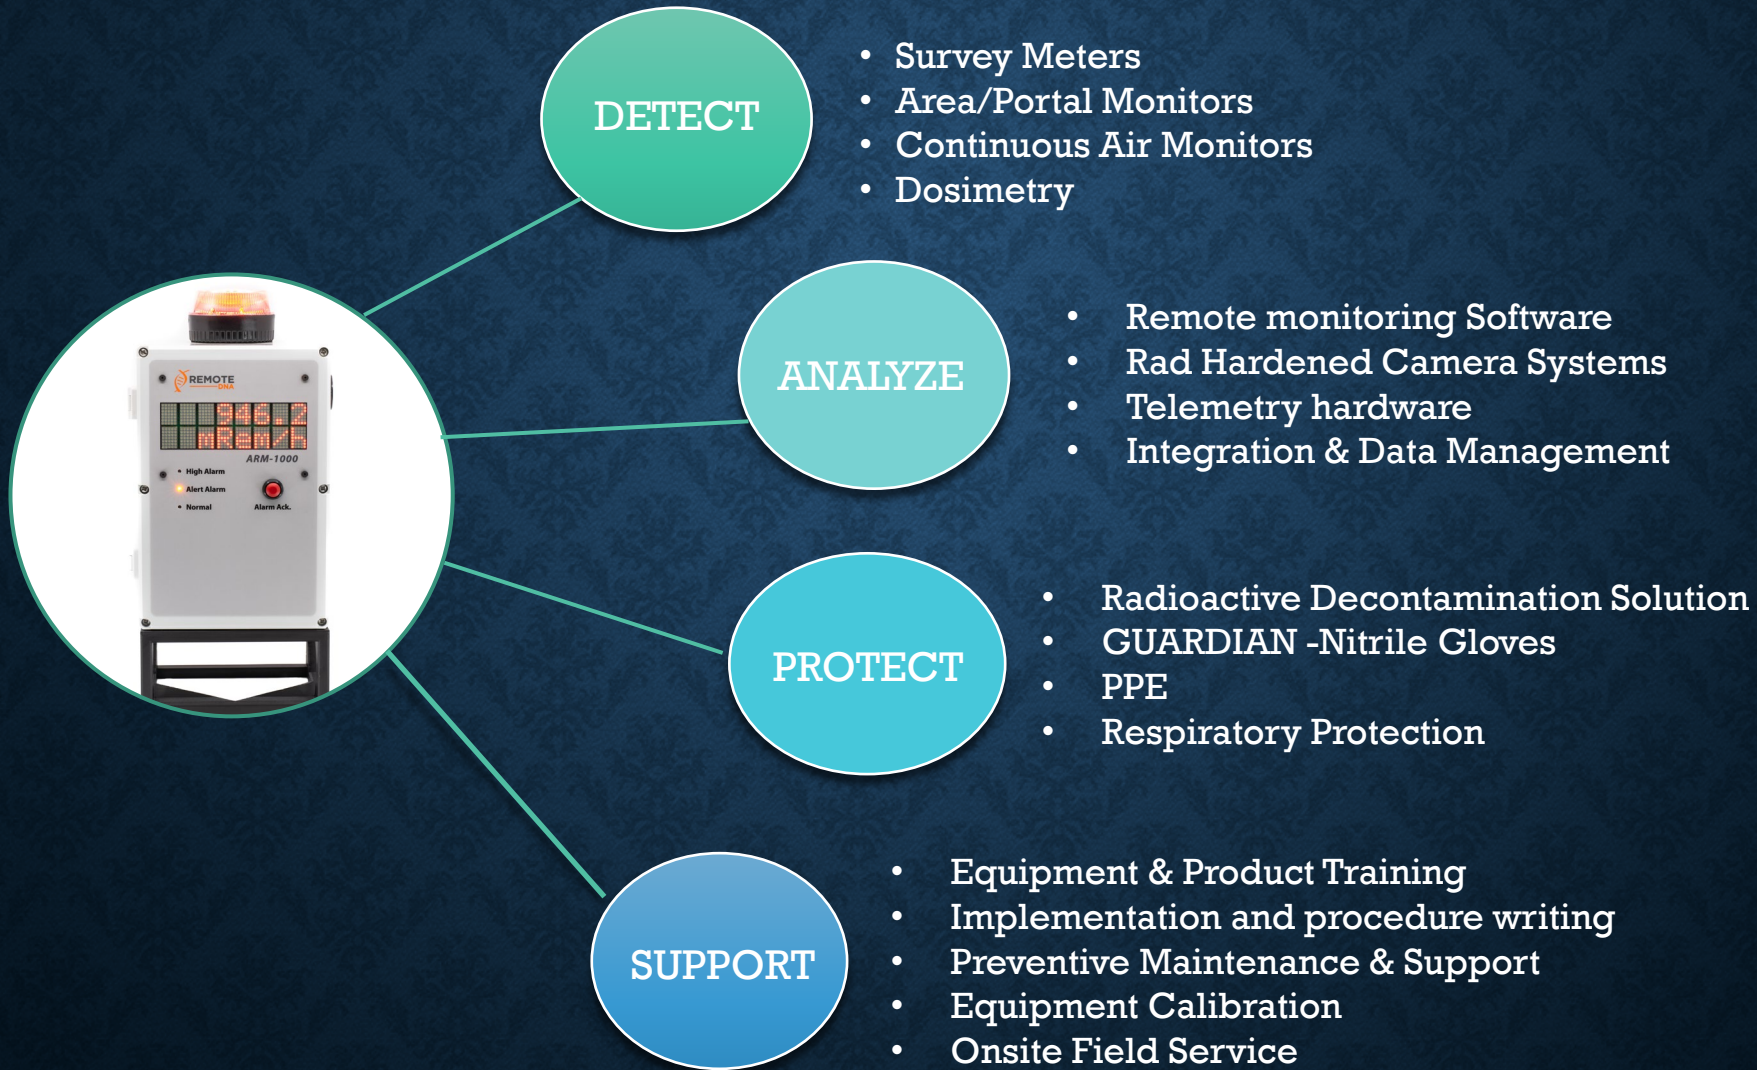

ADVETAGE now offers Technical Consulting Services.

Advetage Solutions initial product offerings were primarily focused on radiation detection instrumentation. Since then, we've expanded our offerings to provide more complete support for our customers health physics and safety needs. This includes our own brand of PPE, radioactive decontamination solutions, and health physics support services from our staff of Certified Health Physicists (CHPs) and Certified Safety Specialists (CSPs). We have also acquired a Nuclear Regulatory Commission Radioactive Materials License, to help clients with their radioactive waste and shipping needs.

Our consulting staff have 60 plus years' experience as health physicists and safety specialists, providing support for the US Navy, Universities, DOE, EPA, Nuclear Fuels Fabrication and Commercial Nuclear Power.

We aim to continuously grow our overall services and commodities by engaging our clients to meet their diverse needs in health physics and safety.

Past Performance

DOE O 458.1 audits and implementation support with Argonne National Labs

Customer: Stratify//MHChew | **Project:** DOE) O 458.1 Assessment

Description: Certified Health Physicist performed Lead Auditor Support to Argonne National Laboratory, for a Compliance Assessment of Department of Energy DOE O 458.1, Radiation Protection of the Public and the Environment.

Review and Revise DOE National RadCon Technician Training Program

Customer: Link Technologies, Inc. | **Project:** Phase 1- Technical Training Evaluation for DOE Radiation Control Technician (RCT) handbook

Description: Provide technical support to Link for review and revision of DOE RCT training handbook. Perform a verification and evaluation of the technical content accuracy and useability of the RCT training handbook. In addition to technical and efficacy review, solicit client feedback through meetings and interactions with DOE health and safety staff.

NY MTA Bridges & Tunnels RadHalo Preventative Maintenance & Services

Customer: New York Metropolitan Transportation Authority (NYMTA) | **Project:** Bridges & Tunnels RadHalo Preventative Maintenance & Service Contract

Description: Preventative maintenance and annual service contract for 10/EA Thermo Eberline RadHalo (gamma and neutron radiation spectroscopic area monitor)

Training SRNS on Radiation Detection equipment uses

Customer: Savannah River Nuclear Solutions **Project:** Dosimetry Training

Description: Develop and instruct an 8-hour onsite radiation safety instrumentation training and Customization of instrumentation.

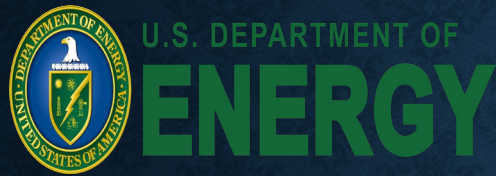

Customized GUI products for Naval Shipyard Radiation Instrumentation to meet program needs (Remote DNA)

Customer: Naval Communications Security Material System (NCMS) | **Project:** Customization and optimization of the “digital status board”.

Description: Customization of Graphical User Interface (GUI), Instrumentation Customization and Instruction was developed and delivered to the needs of the Naval Shipyard Radiological Control Staff. Training was developed at a level appropriate for the learner.
